Description

Using PluginTracker and after setting a wiki page language to Portuguese I was able to see the Portuguese version of the fields (including pre-defined ones), as well the translation of the box comment that says: "All fields with * are mandatory". However, after editing the plugging parameters clicking on the plugin icon settings on the page, the page loses its language definition and it must to be set again, every time I edit the plugin.

Solution

Fixed in item5700
