Solution

Plugin updated to use bootstrap tabs (with ul/li) instead of current buttons from tiki12. (changes on r57508 for tiki15, back ported to tiki14)

Hi rjsmelo, the display of the version tabs is fine, but something became broken with the display of the page: left column is gone, buttons that should be at the bottom of the page are and the top right corner on top of other content (and below the structure navigation bar), etc.

Hi Xavi, can you please retest, there was a extra closing div tag

Fix confirmed, thanks, Ricardo!

Hi Xavi,

when you have 5 minutes can you have a look on this ticket to see if we can close it.

Thanks,
rjsmelo
