Description
　　　Update PluginVersions to Bootstrap classes (missing tabbed-like display). Tab titles show up as if they were plain text. However, if you click on them, links do work indeed. Itis just a question of missing css classes, I guess, to restore the intuitive display.

　　　See:
　　　https://doc.tiki.org/PluginVersions#Basic_example

　　　And compare it with:
　　　https://doc.tiki.org/pluginTabs#Example

　　　These plugin was used in doc.t.o pages. It looks like a standard Plugin Tabs, but the difference is that when you click on a tab title, all sections with plugin tabs siwtch to that version, so that you can print a long page (ideally, a whole wiki structure) with the sections related to that version of the software set to display its contents in place.

　　　Something like these css properties might be missing at ./themes/default/css/default.css in trunk:
　　　🗋

/* Versions plugin */ .versionav { padding: 0; border: 1; margin-bottom: -1px; border-color: #eeeeee #eeeeee #dddddd; border-bottom: 1px solid #dddddd; } .versionav .button { margin-bottom: -1px; } .highlight { background-color: #f5f5f5; color: #262626; margin-bottom: -1px; border-top: 1px solid #e2e2e2; border-left: 1px solid #e2e2e2; border-right: 1px solid #e2e2e2; }

Solution

Plugin updated to use bootstrap tabs (with ul/li) instead of current buttons from tiki12. (changes on r57508 for tiki15, back ported to tiki14)

Hi rjsmelo, the display of the version tabs is fine, but something became broken with the display of the page: left column is gone, buttons that should be at the bottom of the page are and the top right corner on top of other content (and below the structure navigation bar), etc.

Hi Xavi, can you please retest, there was a extra closing div tag

---

Fix confirmed, thanks, Ricardo!

Hi Xavi,

when you have 5 minutes can you have a look on this ticket to see if we can close it.

Thanks,
rjsmelo
