Description

A check box to mark the tacker can only be submitted once per person, like in the quiz feature, but with trackers.

I've tried everything I can think of that was written in every tracker help page to force only one submission per user. (not the same as one entry per user, since it seems I can re-submit the form over and over to modify the answer.)

Tested in trunk as of Jan 19th 2016 (r57256) and I confirm that there is some regression bug at least in trunk: standard registered user is able to submit a new item even if the setting to allow just one item per user or ip is enforced.

To reproduce: login as
u: user1
p: user1

(plain registered user)

And go to

http://duqtape-11783-5792.show.tikiwiki.org/tiki-view_tracker.php?trackerId=1

where you will be able to insert new items, when you shouldn't, since the tracker setting "Only one item per user or IP (The tracker needs a user or IP address field with the auto-assign set to
Creator" is enabled, and that user field is set as required.

You can admin the site with:

u: admin
p: 12345

Solution

It seems to be fixed by amoeba32 in a recent commit:
http://sourceforge.net/p/tikiwiki/code/57480/

I'll upgrade the test site here to retest. done

Fixed, even if the user attempting to add a new item (once a previous one was added already) did not see any error message, and might think that the changes were updated (like casting a new vote replacing the old one, in the use case set in the show.t.o instance)
http://duqtape-11783-5792.show.tikiwiki.org/tiki-ajax_services.php?controller=tracker&action=insert_item&trackerId=1&modal=1

Confirmed for 15.x, it looks duplicate check code only exists in tiki-view_tracker.php, but it is not used anymore in favor of AJAX version, where there is no check for this permission.

Xavier de Pedro 09 Feb 16 05:57 GMT-0000

It's marked as fixed. If you did so, please change status to pending and set it to "please retest" in the dropdown, so that aurhor (or others) can help confirming it's fixed and close the item in the bug
tracker.
Thanks!

Constantin B 09 Feb 16 15:43 GMT-0000

Somehow my email is still bouncing, so I reply here to your comment:
> Please note, however, that the user attempting to add a new item (once a
> previous one was added already) did not see any error message, and might
> think that the changes were updated (like casting a new vote replacing
> the old one, in the use case set in the show.t.o instance)

There is an error message "Item could not be created." if trying to add duplicate record,
http://prntscr.com/a1194r

May be message text is not that accurate, so reason is not clear. Do you think to change it to
something more meaningful?

Xavier de Pedro 09 Feb 16 15:50 GMT-0000

It's meaningful enough. I don't recall seing it, so may be the issue was that the user was not sent
(scrolling up) to where the error was shown.
Maybe?
