Description

<https://tiki.org/Community> user info popups show "Last Login" as "Never logged in" but on the user info page such as <https://tiki.org/user1553> it shows fine.

It's also not a problem on dev so i suspect an intertiki thing...

Solution

Preference feature community mouseover lastlogin must be enabled (Preference name: feature_community_mouseover_lastlogin)

Workaround

actually testing saving a tracker item...

Brilliant! Wonder who turned it off?

I spent quite a lot of time a while ago trying to debug this but couldn't reproduce... well done Luci! 🇬🇧

Fixed the misleading info in <http://sourceforge.net/p/tikiwiki/code/65745>

I suppose you can close this.
