Description

Youtube has deprecated v2 api, that was used in module last_youtube_playlist_videos

https://developers.google.com/youtube/2.0/developers_guide_protocol_playlists

v3: <https://developers.google.com/youtube/v3/docs/playlistItems/list?hl=es>

Example of (defective) output, see:

https://doc.tiki.org/Module+last_youtube_playlist_videos

Xavi, I updated 15x to use V3 API, however there is a need to use new dev_key parameter with GoogleAPI key, can be obtained here <https://console.developers.google.com/apis/credentials>
Let me know if it works for you and I will update documentation

Xavier de Pedro 06 Apr 16 15:00 GMT-0000

Hi Constantin, sorry got lost.
I see this error message in the doc.t.o page:
https://doc.tiki.org/Module+last_youtube_playlist_videos

Error calling GET

<https://www.googleapis.com/youtube/v3/playlists?part=snippet&id=PLYkFSuLveZe4UxzCgMKvEDJL7YCjEM41R>&hl=en: (403) Daily Limit for Unauthenticated Use Exceeded. Continued use requires signup.

I did go to signup, and didn't get the whole thing clear. I created some keys, linked to my own private gmail account, but unsure about how to proceed in general so that this feature in Tiki can be used again easily without so many complications.

Constantin B 07 Apr 16 15:12 GMT-0000

Hi Xavier, once you get google API key, please add it as parameter "dev_key" to the plugin parameters. So it should look like this (it has my key inside)

```
{module module="last_youtube_playlist_videos"
id="PLYkFSuLveZe4UxzCgMKvEDJL7YCjEM41R"
dev_key="AIzaSyC6fmc_2mEtnytrzJeeV4mFbFEfvczSfg0"}
```

Xavier de Pedro 08 Apr 16 11:13 GMT-0000

Ah, ok, great, I can see it working in your example. thnks

However, to prevent the key from being copied over to other sites away from the key creator, I would suggest to have some admin pref to set that key site-wide, in similar fashion to the Google Maps key that can be set in the Admin panel for Maps. But this time, it should be in some admin panel for videos, maybe?

Or at the General admin panel?

Opinions?

If I'm understanding well this issue is now solved and turned into a feature request. (nice one btw). If yes, please update the ticket.
