Description

For some reason, svn update FAILS to update on show.t.o instance linked to dev.t.o bug tracker item

Example:

https://dev.tiki.org/tiki-view_tracker_item.php?itemId=5493

Click at svn update.

It doesn't seem to update the instance, which still is at

Last update from SVN (12.5): Sunday 17 of January, 2016 15:28:05 CET - REV 57249 (MyISAM)

(as seen on <http://xavi-9794-5493.show.tikiwiki.org/tiki-admin.php?page=general>)

and to check the bug fix we need to update to r57742

I believe it to be a server-side issue, the AJAX request returns with a "504 Gateway Time-out" error, will ask the sysadmins...

update, the server side issue is fixed - was a disk space issue that was caught by monitoring but I had to figure out a way to delete instances logically from the oldest ones that are linked to closed tracker items. There is however still front-end issues (it seems that I have to click more than once for the user feedback spinner to appear, which is weird as well as it seems I have to scroll down
