Description

I did a fresh install of Tiki 15.0 Alpha and made it set up a new database. I left everything at its default values (as far as no input was required). I did not run any of the wizards for applying ready-made profiles or theming. Instead I went directly to the Feature section in order to enable the Trackers feature. But there is no checkbox for selecting the feature.

Screenshot

If I apply the Company_Intranet_12x profile and return to the Features configuration, the Tracker feature checkbox is there. It is not there after applying the Small_Organization_Web_Presence_12x profile.

Solution

Fixed with: Revision: 58230

Someone decided that trackers are an advanced feature so you need to set your admin filter to show advanced prefs as well as basic.
Sorry...

Gary Cunningham-Lee 21 Mar 16 10:02 GMT-0000

Let's change them to basic. Do you agree? Even for a simple contact form they are needed.

Jonny Bradley 21 Mar 16 13:56 GMT-0000
