Description
Since the 14.2 release, any page I have with a row of images, containing links to URL's, do not line up properly.

All are displayed correctly inside the wysiwyg editor, as shown here:

In v13.0 and previous versions, my live page looked the same as above, however, in 14.2 all images are displayed on a new line, so my page looks like this:

My page code looks like this:
--- __Social and Online Media__ {img fileId="26" width="48" link="https://www.facebook.com/"} {img fileId="28"

width="48"
link="https://www.google.co.uk/url?sa=t&rct=j&q=&esrc=s&source=web&cd=1&cad=rja&ved=0CDoQFjAA&url=https://plus.google.com"}{img fileId="27" width="48" link="https://uk.linkedin.com/"}{img fileId="29" width="48" link="https://twitter.com/"}{img fileId="17" width="48" link="http://www.lovefilm.com/"}{img fileId="30" width="48" link="http://www.youtube.com/"}

What has gone wrong?

Comments

Gary Cunningham-Lee 29 Mar 16 08:03 GMT-0000

The reason for the changed behavior is that images added with the img plugin syntax are now getting the "img-responsive" CSS class by default. This makes them automatically resize when the page is viewed in a smaller screen, etc. But the downside of this is that the images also have a "display:block" property which means each one starts a new line in your content. You can override this by adding _responsive_="_n_" to the code for each image. I'm not sure offhand what the interface for adding an image in the WYSIWYG editor is like, but if there's an option there to turn off "responsive" image, that should be done when the image is added. (This is true for any image that you want to display inline with text.)
