- 🟡 mime type detection for upper case filenames

Description

I edit an image from the file galleries using *Edit properties*.

It does not matter that it's in list or browse view.

The image is of type "image/jpeg", as is reflected in the database dump:

```
INSERT INTO `tiki_files` VALUES
```

```
(4321,120,'P1080902.JPG',,1452031989,'P1080902.JPG',424279,'image/jpeg',NULL,'Jyhem',NULL,0,
NULL,NULL,NULL,NULL,'435783c7acc75fad9fe03d146b238a8c',NULL,NULL,'f79bf974b338faad5e
21ed9eb3fd2dfe',,NULL,1452031989,'Jyhem',NULL,',',0,NULL);
```

But it shows the first item in the "type" drop-down (application/andrew-insert) instead of image/jpeg

And it's a long long dropdown so fixing it is a pain 😞

Can't reproduce it on 15.x. Can you on demo instance? admin/12345

Jean-Marc Libs 31 Mar 16 19:50 GMT-0000

Yes, I can demo it 😊

Sorry for not creating the show instance, I had 100% reproducability so I thought it was not needed. This is interesting. Could it be that your file has extension .jpg while mine has .JPG (uppercase)?

Constantin B 07 Apr 16 15:18 GMT-0000

Not sure if I do it right, but still can't reproruct. Plz take a look at shots below:

Jonny Bradley 07 Apr 16 15:23 GMT-0000

Hi Constantin

Hopefully i fixed it in r58235?

Jean-Marc Libs 08 Apr 16 11:38 GMT-0000

I looks good for "normal" cases, not edge cases like strangely-named files.

I suspect reverting r56951 would have been a better fix, but r56951 also fixes another issue. Needs testing which I can't do today, sadly 😞
