Description

For example on <https://suite.tiki.org/KeePass> when you click Related links in the TOC it does not go to [KeePass#Related_links](#) but to the [tiki-index.php#Related_links](#) instead.

Solution

r58229 hopefully

Indeed - looks like it's caused by a combination of feature_sefurl and feature_html_head_base_tag i think - it's ok if feature_html_head_base_tag is disabled (but then i expect other things don't work)

Jonny Bradley 07 Apr 16 09:32 GMT-0000

I think the fix is to use the canonical uri as the base href, but that's so badly coded it makes it hard to do a clean fix - am working on it (when i can)

Gary Cunningham-Lee 07 Apr 16 06:37 GMT-0000

I'm trying to figure out how to get that "legacy" table of contents. At my sites, when I activate "auto-toc" I get the new scrollspy method. How is the legacy autotoc done?

Jonny Bradley 07 Apr 16 09:30 GMT-0000

add {maketoc} to the page and turn off autotoc (same as always)

luciash d' being ☐ 11 Jan 17 20:10 GMT-0000

Thanks Jonny, fix confirmed. Closing.
