Description
Provide a tablesorter-powered list of profiles in the Profiles Wizard bundled in Tiki to filter on features, tags, names and such

Profiles Wizard has many profiles, and sometimes the admin wants to filter those by feature name that they have enabled, or by tags (demo, learning, advanced, etc).

I don't know yet how to do that at the profiles wizard itself (first screen of that wizard? or second, just after the featured? ....)
There seem to be nice and advanced ways to display the whole list but allowing clever filtering, as seen here:
https://doc.tiki.org/TableSorter

Work started to have tags added to the profiles in profiles.t.o, so that they can be searched/filtered by the features used in them, etc.
