- Missing item on my items

Description
At dev.org 2 days ago I had a pending item where I was the creator and someone else a modifier:
https://dev.tiki.org/item5028

It was not displayed on my items at :
https://dev.tiki.org/tiki-user_information.php#contentuser_information-2

Trying to pin-point I modified the item to be also the modifier but it didn’t help.

This is pretty critical and nearly a blocker.

Hi B
You reported this in February and i commented on it then - see https://dev.tiki.org/item5832
(only open items have ever been shown on "my items" so this is a feature request if anything, not a blocker imho)
