Description

Line 58 of tiki-objectpermissions.php has the variable \$perm written with a double \$ sign twice.

```
if (!$tiki_p_admin_objects 'y'
```

```
(isset($$perm) && $$perm 'y')
```

```
$special_perm) && $special_perm 'y') {
```

should read

```
if (!$tiki_p_admin_objects 'y'
```

```
(isset($perm) && $perm 'y')
```

```
$special_perm) && $special_perm 'y') {
```

Still newbie here, not confident enough to commit changes.

Easy to solve?

10 easy

## Comments

**Jonny Bradley** 12 Apr 16 09:45 GMT-0000

I think that's deliberate, please don't fix without testing (i think \$perm will be set to something like 'tiki\_p\_view', so \$\$perm will be the global var \$tiki\_p\_view - but do't have time to dig into it more now)

Keep checking though please! Thanks 😊
