### Description

To see the changes in a tiki site you can use module `since_last_visit_new`

When you entered already one day, logout, login again days later, the focus is to show changes since the last date you did login, afaik.

Using the standard (former) calendar UI (i.e., NOT using FullCalendar UI), you can click on a date in the calendar to "change focus" to that date, so that `since_last_visit_new` module show changes since that new focus date.

This is not possible any more with FullCalendar UI (or I didn't know how to do it)
