Description

// eng=kor

I could not get a screen shot and upload file, So I used 'imgur.com'

화면 캡처와 파일 업로드를 할 수 없어서 imgur.com을 이용했습니다.

<http://imgur.com/w0mEo3i>

// Detail description

Control panel - Edit and plugin - syntax highlighter(codeMirror) - Check

--> Heading(1,2,3) button forced refresh page

제어판 - 편집 - 코드미러를 체크 하고 -> H버튼을 누르면 화면이 강제로 전환 됩니다

Each of the two functions are working well, thus I am manually typing '!'

두 기능은 각각 잘 작동합니다. 그래서 저는 직접 타이핑 합니다

... A little hard but, Tiki is fun and interesting 😊

Solution

Hope r58316 helps... thanks for the great report! 😊

Hello wewe,

Happy to see it is solved.

Has you mentioned that it work well now after Jonny fixed I update the status of your ticket and close it.

Please next time update your ticket accordingly.

Thanks to help. 😊
