Description

To be reproduced, see:

<http://xavi-9794-5464.show.tikiwiki.org/tiki-index.php?page=D1+Cover>

u: admin

p: 12345

And see the same page as user:

u: user1
p: user1
which has been granted local permission to view and edit that page, and global permission to edit structures. If you attempt to go to edit the structure,

http://xavi-9794-5464.show.tikiwiki.org/tiki-edit_structure.php?page=D1+Cover&page_ref_id=1

you get:

“

Error: You do not have permission to use this feature: tiki_p_view

Potential Workaround:

Comment out the check for the permission to display any part of the edit structures interface. Line 22 from tiki-edit_structure.php should become:

```
//$access->check_permission('tiki_p_view');
```

And line 123 from templates/tiki-edit_structure.tpl should change from:

```
{if $editable == 'y'}
```

to

```
{if $editable == 'y' && $tiki_p_edit == 'y'}
```

Should that be enough?

I couldn't test properly due to the interference of this other bug which prevents assigning object permissions:

<https://dev.tiki.org/item5916>

Solution

Hopefully [r58429](#) does the trick - i don't see the need to test for edit (wiki page) perm when editing a structure, as \$editable is set according to edit_structures (and locking).

HTH

Fix confirmed, thanks jonny!

Backported to 14,x in r58458, and to 12.x in r58459
