Description

tracker inline edition doesn't edit the field, just re-loads the page.

Reproduced here:

<http://xavi-9794-5922.show.tikiwiki.org/tiki-index.php?page=Community+Members+HomePage>

u: admin

p: 12345

Log in as admin to the site, and Click at the icon to edit inline any field.

The page is refreshed (maybe after quickly showing the controls to edit the value).

---

Update: when clicking on radio button or date fields, I get to see the edit form, but it quickly disappears with the page reload.

Solution

r58745 i hope

---

Yaya, fixed, jonny, thanks heaps!

Workaround

Use the {list} plugin? ;)

## Comments

**Jonny Bradley** 25 May 16 13:34 GMT-0000

Seems to also be a problem on trackerlist with inline editing enabled, but i can't seem to see a commit since 15.x branched (or before) that could be responsible, nor can i find what is triggering the reload... most mysterious.

**Bernard Sfez / Tiki Specialist** 26 May 16 05:29 GMT-0000

After login as admin I don't see any item in the trackerlist so I got no edit button there.

<http://i65.tinypic.com/312weut.png>

Can you check the demo before I do some triage ?

**Xavier de Pedro** 31 May 16 06:52 GMT-0000

Sure, sorry Bernard, human-ish error (it was converted from a trackerlist plugin filtered by date on a former date, and therefore, no more upcoming events shown). Fixed, items displayed.

Thanks for reporting.
