Description

Hello,

I have a scenario I cannot get working in Tiki15, but I managed to let it work in 14.2.

It is about plugin tracker inline editing.

Whereas I managed to activate inline editing, it just does not work when clicking on the small icon.

On one case, I see a lock icon and the page returns to its initial stage.

Did I forget something in the activation?

In the attached images, you can see the small icon next to the field. When I click on it in Tiki 14.2, the field is replace with an editable field, in Tiki 15, nothing happens.

Thanks,

hubert

Solution

Maybe fixed already, as the (potentially) duplicated error report says it was fixed long ago? (<https://dev.tiki.org/item5922>)

Seems a duplicate of a 15 regression bug 5922
