I am commenting here to just bring it back up to the top of the radar, this would be wonderful if we could have this fixed, and optional to bring back the collapsible floater TOC. Thanks for reporting this. I love the concept, but only if it can be made optional.

"collapsible floater TOC"? When was that removed?

Philippe Cloutier 29 Jun 18 15:09 GMT-0000

As indicated by Lukas Masek on tikiwiki-devel, autotoc collapsed by default from Tiki 12 to 14. This behavior was lost when autotoc moved to Bootstrap.

"collapsing" may better describe the previous behavior, since there was no way to tell the TOC to stay collapsed or expanded.

The problem can no longer be seen on the History page.

So this happens even if `wiki_inline_auto_toc` is enabled?
