Description
Plugin Tracker Item Field test feature is not working. It always shows the content, no matter if the test should go positive or negative.

In the show instance, I’ll use an example as in Doc.tiki.org. The desired effect would be to show the message only if there was no items associated with the user. So, when a user have an item, it should show nothing (or anything after the ELSE)

Show instance: http://fvtorres-11800-5970.show.tikiwiki.org
User: admin
Pass: 12345

Thanks!
