Description

when listing a gallery via `tiki-list_file_gallery.php?page=fgal&galleryId=<GALLERYID>`, there should be a way to disable the gallery tree on the left. I have the same gallery tree in the left tiki bar, so I have it twice on the page, when working in the file galleries.

Workaround

Hi Oliver!

This could be done since many tikis ago, with the display option per gallery to display the file tree Explorer. E.g.: I removed it from here:

https://tiki.org/tiki-list_file_gallery.php?edit_mode=1&galleryId=35#contentlist_file_gallery-2

Ups, however, I confirm it doesn't work in 16.x at least (currently t.o) per file gallery, and only works if you disable that globally in the tiki site (which does work still indeed, after testing it).

Global option here:

https://tiki.org/tiki-admin.php?page=fgal#contentfgal_admin-3

(Search for "Explorer")
