Description
    Since upgrade from 12 to 15: weird characters in non-english notification emails (wrong encoding?)

    Reproduced here:
    http://xavi-9794-6008.show.tikiwiki.org/tiki-view_tracker.php?trackerId=1
    u: admin
    p: 12345

    Change the email associated to the user "xavier" to one email of yours. And as admin, add a new
    item to the tracker1 (user "xavier" is subscribe to the tracker already). Interface is in Spanish for all
    (sorry for that, but needed for easy setup of the testing environment 😃.

    Email received got proper encoding and chars displayed in the subject for me, but not in the email
    body, where there were wrong chars displayed.

    For instance, this part:

    Testing special charaters: ÃÃ‰ÃÃ"ÃšÃ±Ã§Ã Ã¨Ã¬Ã²Ã¹

    was expected to show:

Testing special charaters: ÁÉÍÓÚñçàèìòù

as shown in the header of the show.t.o instance.

Full email received (short headers shown heere, sorry; I couldn't see any charset info in the full headers; for full headers, send a notification email to your own email as indicated above):
