Description

I wonder if this issue is just happening in show.t.o and why.

But in any case, it's preventing to report any bugs in trunk (16.x), so I hope someone can have a look at this issue.

trunk (16.x) in show.t.o: I can't do the first login as admin admin

Reproduced here:

<http://xavi-9794-6009.show.tikiwiki.org/>

I can't login to the new trunk show.t.o instance just created, neither with Chrome nor Firefox, with the usual credentials for the first connection:

u: admin

p: admin

I get invalid username with this url produced in the first attempt to connect:

http://localhost/trunk/tiki-change_password.php?user=admin&oldpass=admin&newuser=y

or with this other one:

<http://localhost/trunk/tiki-login.php>

I get:

Error

Invalid username or password

Update:

I checked today table users_users and I confirm that there is no user admin created at all.

Workaround

Should be fixed by commit r59141.

Please recheck
