Description

When workspace is created - the corresponding perspective and user groups are created, but not the corresponding category. Moreover, a blank (no name) top-level category appears at the category list.

The errors that appear:

PHP (5.6.22) NOTICE (E\_NOTICE):

File: C:\Bitnami\tiki-15.1-0\apps\tiki\htdocs\lib\smarty\_tiki\block.permission.php

From <[http://localhost/tiki/tiki-browse\\_categories.php](http://localhost/tiki/tiki-browse_categories.php)>

Possible explanations:

1. Workspace initialization problem due to an incompatible name (ex. workspace template is H, workspace name - S: :P, the resultant name - H: :S: :P).
2. Conflict with the Areas feature.
3. Categories are not preconfigured correctly (it used to work, however, without any preconfiguration, stopped working after I reenabled Workspace UI and enabled Areas).
