Description

The usability bug appears while updating the newer version of the file.

There is a field for a comment given to the newer version of the file being uploaded, however, what is being typed is not displayed:

If we then look, it displays what I typed as metadata (works properly here):

I believe that the feature is unimportant and the bug it comes with confuses a non-technical user, the feature is to be fixed or got rid of

Importance

You can enabled the comments column on the file gallery (list) view and then they show up - agreed it's not a great feature but not broken, maybe some documentation would help 😊

Jonny Bradley 20 Jul 16 15:55 GMT-0000

Sorry, i reread your description, you meant the text is white on a white background?

Which theme is this in? Seemed ok for me (using jquery and fivealive-lite)

Roman Zakharenkov 20 Jul 16 16:00 GMT-0000

Hello Jonny,

Yes, the problem is that the color of the text is the same as the background's.  
The theme is Yeti, jquery is used (flick if it is of any relevance). Tiki 15.2.
