That's odd, i checked this and got the error too a few days ago but now it seems to work ok - maybe a cache clear or composer update was needed? Can you retest please?

Thanks 😊

Oliver Hertel 13 Jul 16 08:36 GMT-0000

Still broken for me. Tried update, cleaned all caches, cleaned browser cookies, tried different browsers even.

Svn: At revision 59166.

Oliver Hertel 13 Jul 16 09:19 GMT-0000

Btw. Chrome developer tools show an error the moment I drop a file onto the canvas.

jquery.fileupload-image.js:240 Uncaught TypeError: Cannot read property 'name' of null

```
// Saves the processed image given as data.canvas // inplace at data.index of data.files: saveImage:  
function (data, options) { if (!data.canvas || options.disabled) { return data; } var that = this, file =  
data.files[data.index], dfd = $.Deferred(); if (data.canvas.toBlob) { data.canvas.toBlob( function  
(blob) { line 240: if (!blob.name) {
```

so blob is undefined at that moment.

Jonny Bradley 13 Jul 16 10:05 GMT-0000

Is this on a public server somewhere?

I just tried on https://next.tiki.org/tiki-upload_file.php and got an odd JSON parse error, and now the database seems to have gone away, maybe it's doing it's update...

Maybe make a show instance here to see if we get the same thing there?

Jonny Bradley 13 Jul 16 10:46 GMT-0000

Ok, next is back and i now get a similar error stuck on "processing..." on https://next.tiki.org/tiki-upload_file.php?galleryId=42

InvalidStateException: DOM Exception 11: An attempt was made to use an object that is not, or is no longer, usable.

More soon...

patrick.proulx 13 Jul 16 20:29 GMT-0000

Not sure if this is the same issue but I was having an issue with fileUpload that seemed to stem from deleteAfter being set to "" rather than NULL (and since it's an integer it was erroring out for me).
<https://sourceforge.net/p/tikiwiki/code/59167/>

Oliver Hertel 14 Jul 16 04:20 GMT-0000

Nope, still broken.

Xavier de Pedro 02 Dec 16 09:21 GMT-0000

Please retest, Oliver. That issue might show up with mysql 5.7 only (maybe), but in any case, it might have been fixed yesterday by kroky6 (in 16.x, and backported to 15.x also).
Thanks!
