Description

tracker status not shown in php7 at tiki-view_tracker.php

To reproduce, use php 7.x, install a new tiki site, and apply the "Bug tracker" profile, for instance.
Then attempt to view status at tiki-view_tracker.php?trackerId=1

"showStatus" shows no column (not even the green question mark)

"showStatusAdminOnly" shows the green question mark in that column

column shown in tiki-view_tracker.php/tpl (the left most column of the table)

and looking at tiki-view_tracker.php, \$smarty->assign('status_types', \$status_types); get 0 number
of status_types

in the count

line 160 onwards, in 15.x

therefore, \$tracker_info%22showStatus%22 = 'n';

...

(and getting lost there)

Someone with better skills of the differences between php7 and earlier versions is needed.

[Edit Torsten: ist that maybe related to Bug 6254 ?]

Solution

r60956 hopefully?

it works for me now, thanks!
