Description
   Newsletter sends text and html and no way to choose only one

   Reproduced here:
   https://tiki.org/tiki-send_newsletters.php?nlId=7

   Wasn't tehre a way to choose that in previous tiki versions? (tiki12 probably or earlier, I used that preference)

   Show instance created by bchauchat and admin pass changed to adminadmin
   See: https://irc.tiki.org/irclogger_log/tikiwiki?date=2016-11-25,Fri&sel=58#l54

   Update:
   This is affecting also the newsletter sending from tiki.org, to communicate new releases to the subscribed users, and it provides very bad image of the polishness of newsletters in our own

servers.

Solution
>   Fixed in r60831 in 16.x, r60832 in trunk, and r60833 in 15.x
>   thanks kroky6

Comments

bchauchat 25 Nov 16 11:34 GMT-0000

I encounter he same pb, in v15.2 and in v16 demo as well

Bernard Sfez / Tiki Specialist 02 Jan 17 08:51 GMT-0000

I think it always have been like this.

Xavier de Pedro 10 Jan 17 09:33 GMT-0000

It might be related to the fact that nllib misses this part (deduced from this commit message that fixed a similar issue in the emails from plugin tracker: https://sourceforge.net/p/tikiwiki/code/59835/)

+ // use multipart/alternative for mail clients to display html and fall back to plain text parts + if($text) + $this->mail->getHeaders()->get('content-type')->setType('multipart/alternative');

that should go in trunk (the setType part) in line 476 of lib/newsletters/nllib.php, just after

```
$htmlPart->setType(Zend\Mime\Mime::TYPE_HTML);
```
