Description
LTS Regression: images not shown if align=center as param (reproduced in doc.t.o)

See this thread were it's explained:
https://tiki.org/tiki-view_forum_thread.php?forumId=2&comments_parentId=60647&threadId=60648&thread_sort_mode=commentDate_asc#threadId=60648

reproduced, also, here in doc.t.o, fixed by hand with that change:

I mass replaced

{img align="center" src="img/wiki_up/}

with
in doc.t.o, but other tiks might be affected by that issue too. (I thought images were gone in some migration between servers or something when I first saw that)

Solution
Should be fixed in r60957.

Is this still a thing? Seems to work fine in my local... with a fileId or src (e.g. {img src="img/icons/star.png" align="center"}) - ah, i see, needs backporting to 15.x?

Yup, is ok in 16.x but not in 15.x - anyone got any idea which commit fixed it?
