Description

LTS Regression: images not shown if align=center as param (reproduced in doc.t.o)

See this thread were it's explained:

https://tiki.org/tiki-view_forum_thread.php?forumId=2&comments_parentId=60647&threadId=60648&thread_sort_mode=commentDate_asc#threadId=60648

reproduced, also, here in doc.t.o, fixed by hand with that change:

https://doc.tiki.org/tiki-pagehistory.php?page=Newsletter+Admin&history_offset=1&paginate=on&history_pagesize=50&tra_lang=sq&diff_style=sidediff&diff_style=sidediff&show_all_versions=y&compare=Compare&newver=0&oldver=31&confirmAction=

I mass replaced

```
{img align="center" src="img/wiki_up/
```

with

```
{img src="img/wiki_up/
```

in doc.t.o, but other tikis might be affected by that issue too. (I thought images were gone in some migration between servers or something when I first saw that)

Solution

Should be fixed in r60957.

Is this still a thing? Seems to work fine in my local... with a fileId or src (e.g. {img src="img/icons/star.png" align="center"}) - ah, i see, needs backporting to 15.x?

Yup, is ok in 16.x but not in 15.x - anyone got any idea which commit fixed it?
