u: admin
p: 12345

I tried the following:

1-created a spreadsheet with two columns; row one had headings, row two data

- http://stirus-11828-6082.show.tikiwiki.org/tiki-view_sheets.php?sheetId=1

- 2-exported the spreadsheet in CSV format, UTF-8 character set
- 3-renamed the export file
- 4-edit the exported file with UltraEdit; changed one field; saved with UTF-8
- 5-created an empty spreadsheet

- http://stirus-11828-6082.show.tikiwiki.org/tiki-view_sheets.php?sheetId=2

- 6-ran import CSV with UTF-8
- 7-no data imported, and the sheet just says "Array".

For any dev willing to debug this issue, see in the attachments section to this bug report, a few csv's to help you debug other cases. (semi real sheet, as taken from the <https://doc.tiki.org/sheet4> real & working example)

I just reproduced this on my 17.x dev environment. No PHP errors. Switching between PHP5.6 and PHP7 made do difference.
