Description

It seems like for every added user it duplicates the votes entries in the plugin body.

It works when the duplicates are manually deleted from there so presumably the duplication is unnecessary and unwanted.

See:

<https://tiki.org/tiki-pagehistory.php?page=Roundtable%20Meeting%202016%2009&compare=1&ol dver=23&newver=24>

Same thing is happening still with tiki 20.x on t.o. Reproduced these weeks here:

[https://tiki.org/201909-TAG-Meeting?latest=1&page\\_ref\\_id=1318](https://tiki.org/201909-TAG-Meeting?latest=1&page_ref_id=1318)

I just edited this morning a couple of options in my choices, through the convene UI, and the edition

added itself in the background a clone of the plugin body several times :

I tried to find the culprit in the plugin code and fix but failed because it is a bunch of jQuery I don't quite understand. Jonny Bradley? 😊
