Description

I'll be happy if this is just a configuration error, but I've tried to make titles of reply posts in forums display in branch 15, and haven't been able to. I'm experiencing this in my localhost branch 15, and I see at the tiki.org/forums that replies have no titles, although an input is provided for them.

I don't see any UI to control reply titles on the forum's edit page.

On tiki-admin.php?page=forums, although I don't want to *require* a title, for testing purposes, I activated "Require reply to have a title". This is the only item I found related to reply title display.

I'm not sure if it's related, but just to be safe, on [/tiki-admin.php?page=comments](https://tiki-admin.php?page=comments), I de-activated "Disable comment titles".

(BTW, there's an asterisk on the label for the reply title, but no explanation and apparently no effect.)

This is either a functional failure (if reply title display is broken) or a documentation failure (if it works but is this hard to activate).
