Description

I updated a previously working 16.x trunk instance.

With preview/save/cancel buttons at top and button.

After editing a page

- The bottom save button saves the edit, but returns you to the edit page again.
- The top button saves the edit and returns you to the normal page as it should.

However, all properties are lost when saved.

- cannot turn on or off comments for the page
- Previously stored tags and description are cleared.

Seems to work ok for me, sadly show isn't able to do trunk instances yet (it needs php 5.6, upgrade coming soon) but i tried it out on my localhost and <https://demo.tiki.org/trunk> and they both seems fine to me - am i missing something?

WizarDave 06 Sep 16 19:38 GMT-0000

I did some more testing using the entire new download from 9-4-2016.
added back my changed files (Happy_Scroll theme, customized /lib/smarty_tiki/block.remarksbox.php and my images)
Still the same problem.
Tried switching themes, just to make sure it wasn't theme related.
Still the same problem.

Additional testing.

- I can add tags and categorize using modules on the page.
 - Then edit the page and they disappear.
- I can change allow comments to y, and add a description using phpmyadmin
 - Refresh the page and comments show up. Click edit and the description is there. Then cancel edit...
 - Add tags and categorize using modules on the page
 - Then edit the page and comments switches back off and the description, category and tags disappear.

Jonny Bradley 07 Sep 16 11:42 GMT-0000

HI Dave

The show server is fixed now so i destroyed the failed one you made and recreated it, so can you try and set up a demo of this problem on there when it's ready please? (assuming it works ok 😊)
