Description
     insert tracker item with modal window fails due to form refresh when choosing page name from
     dropdown options (in a tracker field wiki page name)

     For the record, it was reproduced here: https://sustainability.seeds4c.org/tracker25
     (site in production, intranet for a university course - ask for a temporary user if you are willing to
     test on site for debugging purposes or something)
