Description
You can batch upload a category tree.

• tiki-admin_categories.php#content_admin_categories1-2

You cannot export a category tree.

It would be nice to be able to export your entire category tree.

• Or specific branches of a tree.

We have a nice profile to setup all countries in a Category branch.

• If we had a way to export branches, then you would not need to setup profiles to import them.
  ○ t.o could possibly have a repository of category branches people have created and shared.

Only set the Easy to solve? value at 5 because I really have no idea how hard it would be to do.

• Please disregard this value if you are more knowledgeable about the program.
If there are existing functions that could easily be modified, this might be a really quick fix.
