Related-to

- ✖ Long url (no space) overflowing should be truncated or visually changed

Description

1. Long text (url) without space spill over tracker contenttabs when viewing an item :
<http://domain.com/itemxxx>.
2. Long text in a comment tab is hidden, should be wrapped and content should be displayed.

Why can't I say the word "url" in here ? a is added all the time...

Solution

Hopefully fixed in [r60305](#)

Workaround

contenttabs can be styled "overflow-wrap: break-word" but I let CSS specialist find the good solution (as well as for the comment one)
