### Description

Spreadsheets (jquery s5 sheets) do not work as expected in a productive environment, even not for use in an internal team.

This is a regression, as they have been working before.

Issue: The edit menu and it's subitems had no effect (Edit | View | Style).

~~Before considering it a bug I want to test here with a show instance.~~

Tested. Fix needed.

try here (show/show => admin/12345)

Torsten

I am confused as jquery S5 was the slideshow, not the spreadsheets. The spreadsheets had been renamed by RobertPlummer to "WickedGrid" and live here now:
