

```
{if $page eq "HomePage"</div>{/if}
main_shadow_start: |
  {if $page eq "HomePage"<div class="home">{/if}
  ...
```

then it works with no fatal error anymore!

What can we do to fix this? Fix the YAML exporter somehow to detect if there are any operands like > or < and if yes export the preference value as multiline even when it is just one line of text?

Anything else?

Thanks for your time reviewing this bug.
