Description
    respect/obey object permissions (beyond global) with plugin pivottable
    To be reproduced in short.
    Cases to be handled properly:
    a) granted globally but restricted locally
    b) granted only locally

    Reproduced:
    admin access:
    http://xavi-9794-6148.show.tikiwiki.org
    u: admin
    p: 12345

    Case a) granted globally but restricted locally
    http://xavi-9794-6148.show.tikiwiki.org/tiki-index.php?page=Homepage+for+Staff
    u: client1
    p: client1
    Group clients has global perms to view and edit wiki pages, but for that specific page, Clients can only see the page, and not edit it (managed through object perms).
    However, user client1 currently can see the button to "Edit pivot table" (by mistake), while can't see the button to edit the wiki page (as expected). If the user clicks at edit pivot table, can change controls, but at saving time, nothing is changed (as expected, since he/she doesn't have perm on that page to edit it).

Case b) granted only locally
http://xavi-9794-6148.show.tikiwiki.org/tiki-index.php?page=Homepage+for+Staff
u: staff1
p: staff1
That page has object perms (not global) for group staff to view and edit. User staff1 can edit the page, but this user doesn't see the controls to edit the pivottable plugin.

Solution
      Fixed in r60071. Thanks kroky6 and jonnyb
