Description

improve doc for devs about the right way to develop permission checks (global, category and local)

I wish there was a place (ideally) where permission checking in tiki was explained for dev dummies: global, catgeg and local object perm checking.

That documentation at dev.t.o should be linked, at least from:

- <https://dev.tiki.org/Permission>
- <https://dev.tiki.org/Permission+inheritance>
- https://dev.tiki.org>Hello+world#To_check_a_permission

Importance
