Description
   Tiki Wiki CMS Groupware v16.0svn (SVN) "Situla"
   Last update from SVN (16.0svn): Monday 31 October 2016 12:39:28 GMT-0100- REV 60095

   Users register to the site autonomously.
   Registration is set to validation by Administrator.
   Member of group Admins cannot validate the users - neither by the validation link in the notification
   email, nor by logging in and trying manual validation on-site.

   So no new users possible at this site with regIstation moderation.
   This is a crucial bug.

   Update 6 Nov 2016: it was reportedt, that 'creation of users' is broken at all in current Tiki16.

Solution
   This was a bug I introduced. It prevented admin validation within the user-login coding. This has
   now been fixed so that admin attempts to validate are not automatically denied.
