Description

PluginConvene UI doesn't allow editing date choices for a user anymore

Reproduced here:

<https://tiki.org/Roundtable+Meeting+2016+11>

Add a user, and then, attempt to edit the user choices: the dropdowns to choose from the options for each date are not shown, but same page is reloaded, with a very long url, etc.

Solution

Pretty certain that's been fixed long ago, and a few more fixes arrived recently in 17.x, re-open if not
