Description

At the Tiki.org forums (https://tiki.org/tiki-view_forum_thread.php?forumId=4&comments_parentId=62116#threadId=62160), after submitting a reply, I get an error: "No thread indicated." Of course I was in a thread when I submitted the post. This happened in one thread but I was able to post a reply in another thread at about the same time, with no problem.

I made a second attempt to post a reply in that thread and this time there was no error message and the thread refreshed as usual, but again without my post.
