Description

Postgres returns row length error to tiki-view_forum.php upon attempt to write data from long e-mail to a forum with email-to-forum functionality enabled.

Solution

```
drop index tiki_comments_ft;  
drop index tiki_comments_data;
```

ZIt is not good to index on **really_long** text fields in PostGRES, anyway....

Closing as outdated since PostgreSQL support was dropped.

Version?
wbeaver2 are you still working on it?
