Description
Layer of a map is not displayed when the tracker used for the searchlayer parameter contain an
item link or an underscore.

''Note: Underscore are added automatically when you have a number in or at the end of a tracker
field. IE : If your tracker field name is "Name 2" then the permname automatically created will be
"name_2".

I had hard time to find what it is exactly so I set 5 samples to demonstrate on the instance.

Solution
Fixed on the instance
