Related-to
• ● Numeric field 0 value is returned as "No value" in the plugin list

Description
Using the plugin List, for a numeric tracker field type I set default parameter in case I didn't enter any value.

But if the field is empty is default value is 0 and therefore, "0" is displayed and that is wrong. 😞
Even when using default=0 the display doesn't always reflect the situation properly.

Hi Bernard,

Can we see the source code for the example you posted? Also, could we see the tracker fields?

Thanks,
Roberto

Hi Roberto,

( thanks for prepending with my name, I still don’t receive notification for comments on devs 😞 )

See :
I have items with no value in the numeric field.

- Trackerlist
- List without trackerrender
- List with trackerrender

As you can see only the trackerList plugin is able to display what’s in the tracker (null).
The plugin List will always add 0 as default value even if I use trackerrender and the default is "".

Thanks for looking.
