Description
PluginChart doesn't produce the expected chart, just the legend

Try to reproduce the example at the documentation, and you'll get the issue reproduced, like in the https://doc.tiki.org/PluginChart

Strategic feature to get Spreadsheets and charts out of them in the game again.

Please note:
This request is to have the png & jpg versions of the charts produced (see: https://doc.tiki.org/Spreadsheet+Graphics+and+Charts#Select_the_Graphic_Type_and_Output_Format), not some js based solution (like reusing raphaeljs or chartjs lib, etc.), since this implies an easy solution for charts in PDF reports working automagically without requiring complex solutions to get js-based charts incluided in PDF reports. A different request/wish will be added to add some optional parameter to get the chart produced with some JS lib already in Tiki like the ones cited

above.

Solution
 Was fixed in trunk in February (i think) somewhere around and including r61416, so should be ok in 17.x i believe

I think there is some confusion

https://doc.tiki.org/PluginChart is different than https://doc.tiki.org/PluginChartJS
