Description

The help icon wont show up if a description is specified:

The below works:

```
{help url="help-me"}
```

This hides the help link entirly:

```
{help url="help-me" desc="{tr}Somehelpful text{/tr}" }
```

along with :

```
{help desc="{tr}Somehelpful text{/tr}" }
```

The help buttons attached to preferences are not effected. It does not look like the json entry is being generated for this smarty tag when a description is given.

This syntax is currently used throughout tiki.

Solution

fixed in r61342

Priority

25

Demonstrate Bug (Tiki 19+)
